Summary

Aspiring Salesforce Developer with a robust background in Full-Stack Web Development (MERN & .NET). Skilled in translating complex business requirements into technical solutions using Apex and Lightning Web Components (LWC), utilizing prior expertise in JavaScript and System Design. Proven ability to architect AI-powered tools and REST APIs, now focused on optimizing CRM workflows and delivering customer-centric solutions within the Salesforce ecosystem.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, C#, C++, HTML5, CSS3
- **Frontend:** React.js, Next.js, Tailwind CSS, Angular, Lightning Web Components
- **Backend:** Node.js, Express.js, ASP.NET Core, REST APIs, GraphQL
- **Databases:** PostgreSQL, MongoDB, SQL Server, MySQL, SOQL/SOSL
- **Tools & Others:** Git, Docker, CI/CD, n8n, API Integrations, Salesforce DX (SFDX), Process Automation

Experience

Myna Solutions | Associate Full Stack Developer

Hyderabad, India (Remote) | October 2025 – January 2026

- Developing an AI-powered online tutoring platform using React, Node.js, and .i implementing personalized learning and real-time progress tracking.
- Building responsive UI components with React and Tailwind CSS to enhance student and tutor engagement.
- Integrating RESTful APIs and WebSocket features to enable live tutoring sessions and interactive content delivery.

Pratham Software (PSI) | Full Stack Developer Intern

Jaipur, Rajasthan | May 2025 – August 2025

- Architected and developed a social media platform with ASP.NET Core, C#, SQL Server, Angular, and n-tier architecture.
- Engineered scalable database schemas and data access layers with Entity Framework Core, improving query performance by ~30%.
- Integrated a real-time AI-powered chat system using OpenRouter to boost user engagement and session retention.

Projects

TaskFlow – Multi-Agent Task Management System (React.js, Express.js, Node.js, MongoDB, CSS3)

- Developed a production-ready MERN task management system with AI categorization (Google Gemini API), real-time CSV processing, automated agent assignment, and secure analytics dashboards.
- Built scalable REST APIs with JWT auth, bulk operations, AI chunked batching, caching (60-80% API reduction), rate limiting, and optimized database queries.

News Digest – Personalized News WebApp (React, Tailwind CSS, Nhost, n8n, OpenRouter (AI), GNews API)

- Developed a personalized news platform that fetches, filters, and summarizes articles based on user preferences using OpenRouter (AI summarization) and n8n (automation workflows).
- Optimized API calls and implemented duplicate article filtering, improving content quality and reducing redundant data processing.

Education

Sri Balaji College of Engineering and Technology, Jaipur, Rajasthan

- **Master of Computer Applications (MCA)** | Expected 2026
- **Bachelor of Computer Applications (BCA)** | 2021 – 2024 |
CGPA: 6.5
